

Mobile Phone Ownership

Look at the chart and read the text. Then complete the text using numbers from the chart. Write % in your answers when needed. There is an example at the beginning (0).

Older teens more likely to own cell phones

Percentage of teen cell phone owners by age, 2008

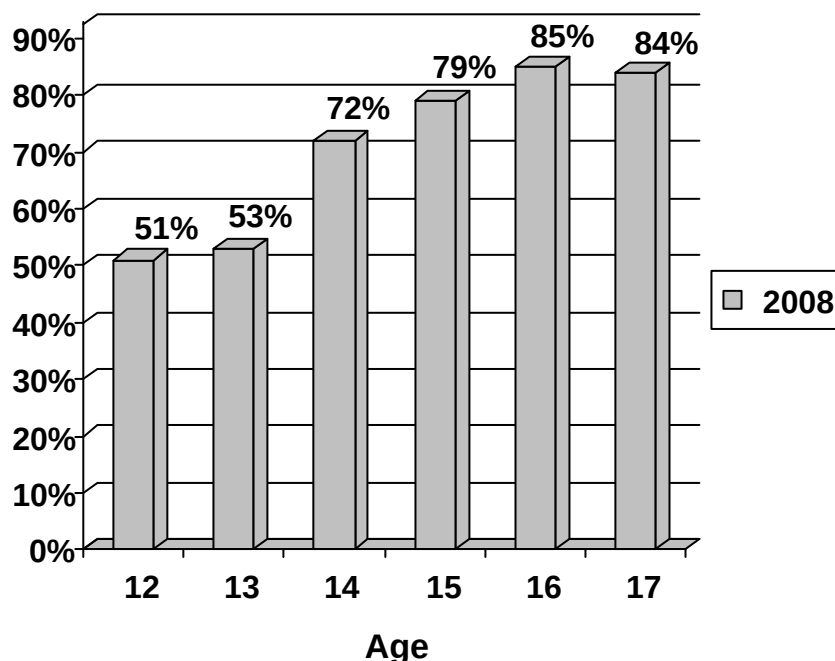

chart: © Lenhart, A. Teens and Mobile Phones Over the Past Five Years: Pew Internet Looks Back. Pew Internet & American Life Project, Aug 2009. <http://www.pewinternet.org/~media/Files/Reports/2009/PIP%20Teens%20and%20Mobile%20Phones%20Data%20Memo.pdf>

Who has a mobile phone?

Among teens, age is the most important variable in mobile phone ownership.

Older teens are much more likely to own phones than younger teens, and the largest increase occurs at age (0) right at the transition between middle and high school. Among 12 year olds, (1) had a cell phone in 2008. Mobile phone ownership jumped to (2) at age 14, and by the age of (3) more than eight in ten teens (84%) had their own cell phone.
