When Adam Potter slipped and fell over the edge of one of the steepest mountain ridges in the Scottish Highlands, his climbing partners feared the worst. Within seconds, the 36-year-old had plunged about 1,000ft down the eastern slope of Sgurr Choinnich Mor, tumbling over three 100ft sheer cliffs on the way, before landing in a heap beside a boulder. A Sea King helicopter rescue crew was immediately dispatched, but they too feared the “worst-case scenario”, so when they arrived on the scene to see only a man standing up and studying a map, the pilot flew on, assuming he was in the wrong place. Incredibly, however, he was not – Potter had survived the fall, and was busy trying to establish where he had ended up. The rescuers soon returned – after following the trail of equipment down the ridge – and flew him to hospital, where he was treated for minor injuries. Potter, an experienced climber, put his survival down to his rucksack, which cushioned the impact as he bounced over rocks and scree. Admitting that he was “lucky to be alive”, he insisted he would still go ahead with an expedition to scale Mount Everest in two months’ time.
